Instructions

Step 1: Choose a number in your boxes for your opponent to find.

The number my opponent is looking for: ____

Step 2: Write down the number your opponent has chosen for you to find.

The number of the box I'm looking for: ____

Step 3: Ask your opponent for the number stored in a random box. For example: "*What is the number in the dotted circle?*". Write the number your opponent says in the box you asked about on the right. Remember to listen for the number you are looking for.

Step 4: Each time your opponent guesses a box, cross out that box. Keep taking turns until each person's number is found.

Step 5: Write down the total number of guesses for each person below.

My total guesses: ____

Opponent's total guesses: ____

Opponent's Boxes
